Hackathon

Our hackathon highlights Climate Change, which is the greatest challenge that engineers need to address

This year we went green!

In a remarkable display of global collaboration and innovation, the World Engineering Day (WED) Hackathon 2024, themed "Engineering Solutions for a Sustainable World," concluded with resounding success. This year, the competition went green, with all challenges aligning closely with the United Nations Sustainable Development Goal 13 - Climate Action.

We had over 2500 participants from across the globe register and received more than 200 innovative submissions.

This year, we go green

13 CLIMATE
ACTION

WORLD
ENGINEERING
DAY HACKATHON

HIGHLIGHTS

- This is the hackathon's 3rd year
- Hackathon run by World Federation of Engineering Organisations in collaboration with UNESCO
- Three great challenges, developed with the support of EWB as WFEO and Hackathon working committees
- All entries to create a 5-min video explaining their solution to a single challenge.
- We received more than 2500 (1000 in 2023) pre-event registrations of which we received 200 submissions
- The competition had 39 judges for Preliminary Round and 5 judges from our partners in Finalist Round.
- Winners were announced live on air, during our 4 Mar 2024 Global Stream

SAFRAN | FUELS TO DECARBONIZE AVIATION

Sustainable aviation fuels (SAF) are a critical part of making aviation a viable low-carbon transport solution. While drop-in fuels could totally replace conventional jet fuel within a few years, hydrogen-based solutions would require major changes in both aircraft and ground infrastructures.

DROP-IN FUELS
Compatible with current aircraft and infrastructure

BIOFUELS
Used cooking oils, animal fats, household, farm and forest waste

SYNTHETIC FUELS
Combination of CO₂ and hydrogen

CAPTURED CO₂

HYDROGEN
Requiring the construction of new aircraft and infrastructure

Low-carbon electricity

Hydrogen produced by electrolysis

Water

Storage and transport of liquid hydrogen at -253°C, taking up 4 times more space

Jet fuel

**80% jet fuel
80% drop-in fuel**

100% drop-in fuel

Université de la Méditerranée (U.M.) et la Faculté des Sciences Médicales et
Marseille Université), présentent un cycle exceptionnel de 4
dans le cadre d'un Master européen avec les Universités de
Marseille.

MARDI 19 MARS 2024, 14H30 - 16H00

**Intelligence artificielle et Santé
Exemple d'application en cancérologie**

Par **Jonathan GARNIER, MD, PhD**, département de
chirurgie oncologique, Institut Paoli-Calmettes
& **Christophe DUBOIS, Pr.** des universités, Biologie
cellulaire, Centre de Recherche en cardio vasculaire et
nutrition, Directeur du master "Biologie-Santé" Aix
Marseille Université et porteur du projet européen.

Plongez dans l'univers fascinant de l'intelligence artificielle (IA), un
domaine en plein essor qui révolutionne tous les secteurs, en
particulier en augmentant la qualité des soins de santé et en
participant à de grandes avancées biomédicales. Dans le domaine
médical, l'IA se positionne au cœur de la médecine du futur,
permettant des opérations assistées, un suivi innovant des patients à
distance, des prothèses intelligentes et des traitements
personnalisés, le tout orchestré par l'analyse du recoupement de
données (big data). Les algorithmes d'IA sont utilisés pour affiner le
diagnostic, intensifier le dépistage des maladies, rehausser les soins
cliniques, stimuler la recherche en santé, et accélérer la mise au
point de médicaments révolutionnaires. Cependant, pour pleinement
apprécier ces avancées, il est crucial que le grand public comprenne
le fonctionnement de ces systèmes afin d'en saisir toutes les
possibilités et les limites. Avec cette série de conférences proposées
par l'UTL, embarquez dans le futur de la santé et de la recherche
façonné par le génie de l'intelligence artificielle.

WFEO & UNESCO LISBON EVENT

HIGHLIGHTS

- On 4 March, WFEO and its National Member for Portugal, the Ordem dos Engenheiros, hosted the flagship event of the 2024 UNESCO World Engineering Day.
- The day consisted of two main sections, one being the WED2024 Opening Ceremony (full video [available here](#)), where UNESCO was represented at the highest level by the Assistant Director General for Natural Sciences, Dr. Lidia Brito.
- Speakers also included WFEO Immediate Past President Prof. José Vieira (Portugal), WFEO President Mustafa Shehu (Nigeria) and WFEO President-elect Seng Chuan Tan (Singapore), as well as Prof. Elvira Fortunato, Portugal Minister for Science, Technology and Higher Education, also a recipient of the WFEO Gree Prize for Women in Engineering in 2021.
- During this Opening Ceremony, Dr Marlene Kanga, WFEO President 2017-2019, announced the results of the [2024 WED Students Hackathon](#).
- The afternoon consisted in a conference on "Energy Transition, Climate Change and Sustainability," with interventions from WFEO leaders and experts as well as high-level panelists such as the former Portuguese Minister of Industry and Energy, Luis Mira Amaral, and the former Portuguese Secretary of State of Science and Innovation, Pedro Sampao Nunes.
- This conference was also live streamed and is available here ([Part 1](#) & [Part 2](#))

Happy World Engineering Day! Engineering has helped to shape the world for millennia and now more than ever, we need engineering to build a sustainable future. But in order to unlock all its potential, there needs to be more equality in the world. Learn more: [#WorldEngineeringDay #WED2021](http://on.unesco.org/EngDay)

More women engineers are needed for a fairer and more resilient world.

Engineering has transformed the world for the better.

Today is UNESCO World Engineering Day!

UNESCO World Engineering Day recognises the crucial role that engineering plays in addressing global challenges such as poverty, inequality, climate change, and environmental degradation. Engineers are instrumental in designing solutions, developing technologies, and implementing projects that contribute to the well-being of societies and the planet.

At ISN our STEAM approach underscores the practical application of engineering principles, fostering innovative problem-solving and critical thinking among our students. Here are some of the project: ...see more

Happy World Engineering Day! 🌐

Today, we celebrate the remarkable contributions and unwavering dedication of our more than 200 [WFP Engineers](#) around the globe. Stationed in more than 40 countries, they play a vital role in ensuring that life-saving assistance reaches those who need it most, while also paving the way for a better future for millions of people.

From rehabilitating roads and building school kitchens, to implementing innovative and sustainable infrastructure solutions, our Management Services Engineers ensure that our programs and operations are efficient, effective, and impactful.

Together, let's continue to build a brighter and more sustainable world for all. 🌐

Recently, I participated in the [UNESCO World Engineering Day Hackathon](#), My team focused on developing innovative solutions for extreme weather challenges in refugee camps.

As we eagerly await the finalists' announcement on March 4th, I'm filled with gratitude for the opportunity to compete for [The University of British Columbia](#). Regardless of the outcome, this experience has been a testament to the power of engineering to address real-world issues and make a difference in people's lives.

A big shoutout to the organizers for providing a platform to showcase our ideas. Let's keep pushing boundaries and striving for positive change! [#UNESCO #WorldEngineeringDay #Hackathon #EngineeringForGood](#)
