# Biennial Conference 2018

THEME:

**THE ROLE OF INFORMATION AND COMMUNICATION  
TECHNOLOGY IN SUSTAINABLE NATIONAL DEVELOPMENT**

The Sierra Leone Institution of Engineers (SLIE) and the Professional Engineers Registration Council, in partnership with Engineers for Change Sierra Leone, will be hosting its Biennial Conference in Freetown from the 27th June – 29th June 2018. The Theme for the Conference is: **The Role of Information and Communication Technology in Sustainable National Development.**

The rationale or raison d'être of this biennial conference's theme is to provide a forum for the engineering profession in Africa to take a hard look at how innovation and ICT can position the continent and its engineering solutions and improve its place in the global industry.

The conference will offer a platform and an opportunity to exchange ideas and learn lessons from researchers, practitioners, and academia within and outside Africa on the role ICT can play in national development.

The Conference will aim to evaluate how we can improve the training of ICT professionals, harness existing and emerging ICT technologies and expand and align our infrastructure to meet the needs of the changing industry in this new era.

Conference Venue  
**GOLDEN TULIP HOTEL,  
ABERDEEN,  
FREETOWN**
