

World Engineering Day (WED)

March 4, 2021

Young Engineers Leading the Way: Video Campaign

In celebration of the World Engineering Day (WED) 2021, the Young Engineers / Future Leaders Committee (YE/FL) and the Engineering for Innovative Technologies Committee (CEIT) of the World Federation of Engineering Organizations (WFEO) invited young engineers from around the World to submit a video to showcase contributions that young engineers are making towards a more sustainable, resilient, and inclusive world.

More than 40 young engineers from more than 20 countries, including many from the leading engineering universities of the world, showcased their videos that highlighted the important role that young engineers play towards accelerating action towards sustainable development. All videos answered one of the following three questions:

1. What is the importance of engineering in working towards a more sustainable world?
2. What advice do you have for young engineers interested in making a positive impact in their community?
3. Share an example of how young engineers are already contributing to sustainable development.

Winner of **#YoungEngineers** Leading the Way: Video Campaign competition is **Roshan TEELUCK**, from The Institution of Engineers Mauritius (IEM).
