2024 WORLD ENGINEERING DAY

FINAL REPORT

**WORLD
ENGINEERING
DAY** FOR SUSTAINABLE
DEVELOPMENT

An aerial photograph of a dense forest, likely a coniferous forest, with a road winding through it. The trees are in various shades of green, and some are bare, suggesting a late autumn or winter setting. The road is a thin, dark line that cuts through the forest. The overall scene is a natural, outdoor environment.

ABOUT

World Engineering Day for Sustainable Development

The World Engineering Day for Sustainable Development (WED) is an official International day proclaimed in 2019 by the United Nations Educational, Scientific and Cultural Organisation (UNESCO). This was based on a proposal from the World Federation of Engineering Organisations (WFEO).

WED is an opportunity to celebrate engineering and the contribution of the world's engineers for a better, sustainable world.

[Discover more](#)

World Engineering Day Hackathon

We are excited this year to welcome back the World Engineering Day Hackathon.

Aligned with a 2024 Theme: Engineering Solutions for a Sustainable World, the World Engineering Day Hackathon will encourage engineering students to work in teams towards a global real-world problem.

Hackathon

Our hackathon highlights the extreme climate challenges faced by today's engineers

This year we went green!

In a remarkable display of global collaboration and innovation, the World Engineering Day (WED) Hackathon 2024, themed "Engineering Solutions for a Sustainable World," concluded with resounding success. This year, the competition went green, with all challenges aligning closely with the United Nations Sustainable Development Goal 13 - Climate Action.

We had over 2500 participants from across the globe register and received more than 200 innovative submissions.

This year, we go green

13

ACTION

WORLD
ENGINEERING
DAY HACKATHON

HIGHLIGHTS

- This is the hackathon's 3rd year
- Hackathon run by World Federation of Engineering Organisations in collaboration with UNESCO
- Three great challenges, developed with the support of EWB as WFEO and Hackathon working committees
- All entries to create a 5-min video explaining their solution to a single challenge.
- We received more than 2500 (1000 in 2023) pre-event registrations of which we received 200 submissions
- The competition had 39 judges for Preliminary Round and 5 judges from our partners in Finalist Round.
- Winners were announced live on air, during our 4 Mar 2024 Global Stream

World Engineering Day Hackathon

For 2024 the World Engineering Day Hackathon is going green. As our students across the globe hack solutions for the world's great climate problems.

13th ANNUAL

Engineering Solutions for a Sustainable World

This competition is a fast-paced simulation of a real-world project. Teams are to work collaboratively on a problem to provide a set of deliverables within a short timeframe. Utilising their theoretical knowledge, students gain first-hand experience to develop their critical thinking, build new skill sets, push themselves out of their comfort zone and build lasting relationships.

World Engineering Day (WED) for Sustainable Development is celebrated on the 4th of March every year as a UNESCO international day promoting the profile of engineers and engineering. WED is an opportunity to engage with governments, organisations, universities, industries, media and the community to address the need for engineers around the world to develop strategic traineeships and best practices for the implementation of engineering solutions for Sustainable Development.

In 2023, The World Federation of Engineering Organisations (WFEO) and its members and partners are hosting the HACKATHON which is an international event with a goal to involve engineering students from all over the globe in the celebration of the World Engineering Day.

The WFEO committee, Young Engineers / Future Leaders (YEF/L), is a talented team of young engineers that work voluntarily to acknowledge and celebrate the young voices of the Engineering profession. Fusa Abu Diab is the Chair of this committee, and is delighted to encourage engineering students from all universities to participate in this worldwide competition and work in teams to present engineering solutions for a global problem that is affiliated to the WED2023 Theme: Engineering innovation for a more resilient world.

FOR SUSTAINABLE DEVELOPMENT

In support of UNESCO World Engineering Day

World Engineering Day 2024

14th March / 1:00 PM GMT / 2:00 PM CET Register: shorturl.at/pCOU

Université du Temps Libre de Marseille et la Faculté des Sciences Médicales et Marseille Université, présentent un cycle exceptionnel de 4 dans le cadre d'un Master européen avec les Universités de Barcelone.

MARDI 19 MARS 2024, 14H30 - 16H00

Intelligence artificielle et Santé
Exemple d'application en cancérologie

Par **Jonathan GARNIER, MD, PhD**, département de chirurgie oncologique, Institut Paoli-Calmettes & **Christophe DUBOIS**, Pr. des universités, Biologie cellulaire, Centre de Recherche en cardio vasculaire et nutrition, Directeur du master "Biologie-Santé" Aix Marseille Université et porteur du projet européen.

Plongez dans l'univers fascinant de l'intelligence artificielle (IA), un domaine en plein essor qui révolutionne tous les secteurs, en particulier en augmentant la qualité des soins de santé et en participant à de grandes avancées biomédicales. Dans le domaine médical, l'IA se positionne au cœur de la médecine du futur, permettant des opérations assistées, un suivi innovant des patients à distance, des prothèses intelligentes et des traitements personnalisés, le tout orchestré par l'analyse du recoupement de données (big data). Les algorithmes d'IA sont utilisés pour affiner le diagnostic, intensifier le dépistage des maladies, rehausser les soins cliniques, stimuler la recherche en santé, et accélérer la mise au point de médicaments révolutionnaires. Cependant, pour pleinement apprécier ces avancées, il est crucial que le grand public comprenne le fonctionnement de ces systèmes afin d'en saisir toutes les possibilités et les limites. Avec cette série de conférences proposées par l'UTL, embarquez dans le futur de la santé et de la recherche façonné par le génie de l'intelligence artificielle.

WFEO & UNESCO LISBON EVENT

HIGHLIGHTS

- On 4 March, WFEO and its National Member for Portugal, the Ordem dos Engenheiros, hosted the flagship event of the 2024 UNESCO World Engineering Day.
- The day consisted of two main sections, one being the WED2024 Opening Ceremony (full video [available here](#)), where UNESCO was represented at the highest level by the Assistant Director General for Natural Sciences, Dr. Lidia Brito.
- Speakers also included WFEO Immediate Past President Prof. José Vieira (Portugal), WFEO President Mustafa Shehu (Nigeria) and WFEO President-elect Seng Chuan Tan (Singapore), as well as Prof. Elvira Fortunato, Portugal Minister for Science, Technology and Higher Education, also a recipient of the WFEO Gree Prize for Women in Engineering in 2021.
- During this Opening Ceremony, Dr Marlene Kanga, WFEO President 2017-2019, announced the results of the [2024 WED Students Hackathon](#).
- The afternoon consisted in a conference on "Energy Transition, Climate Change and Sustainability," with interventions from WFEO leaders and experts as well as high-level panelists such as the former Portuguese Minister of Industry and Energy, Luis Mira Amaral, and the former Portuguese Secretary of State of Science and Innovation, Pedro Sampao Nunes.
- This conference was also live streamed and is available here ([Part 1](#) & [Part 2](#))

Today is UNESCO World Engineering Day!

UNESCO World Engineering Day recognises the crucial role that engineering plays in addressing global challenges such as poverty, inequality, climate change, and environmental degradation. Engineers are instrumental in designing solutions, developing technologies, and implementing projects that contribute to the well-being of societies and the planet.

At ISN our STEAM approach underscores the practical application of engineering principles, fostering innovative problem-solving and critical thinking among our students. Here are some of the project: ...see more

Happy World Engineering Day! 🌍

Today, we celebrate the remarkable contributions and unwavering dedication of our more than 200 #WFPengineers around the globe. Stationed in more than 40 countries, they play a vital role in ensuring that life-saving assistance reaches those who need it most, while also paving the way for a better future for millions of people.

From rehabilitating roads and building school kitchens, to implementing innovative and sustainable infrastructure solutions, our Management Services Engineers ensure that our programs and operations are efficient, effective, and impactful.

Together, let's continue to build a brighter and more sustainable world for all. 🤝

Recently, I participated in the UNESCO World Engineering Day Hackathon, My team focused on developing innovative solutions for extreme weather challenges in refugee camps.

As we eagerly await the finalists' announcement on March 4th, I'm filled with gratitude for the opportunity to compete for The University of British Columbia. Regardless of the outcome, this experience has been a testament to the power of engineering to address real-world issues and make a difference in people's lives.

A big shoutout to the organizers for providing a platform to showcase our ideas. Let's keep pushing boundaries and striving for positive change! #UNESCO #WorldEngineeringDay #Hackathon #EngineeringForGood

To celebrate UNESCO World Engineering Day for Sustainable Development on Monday 4 March 2024, FIDIC is giving a big hat-tip to the crucial role of engineering for the future of the infrastructure sector by inviting its professional community to participate in a series of special offers to boost their professional development.

Let's celebrate #WorldEngineeringDay by investing in professional growth and reaffirming our shared commitment to engineering a sustainable future together! 🤝

The theme for 2024 is "Engineering Solutio..."

Today our featured engineer is Lethabo Matabane. This is what she had to say about being in an engineer.

1. What do you do as an engineer?...
