

International Congress of Civil Engineering 2012

International Congress
of Civil Engineering 2012
Monterrey, Mexico.

Climate Change, the new
challenge for the engineering

November 21-23, 2012

Climate Change
The New Challenge for the Engineering

21-23
November

MONTERREY
CINTERMEX

CONGRESS GOAL

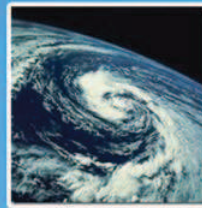

To identify the world's latest technology improvements and advantages that are offered through Civil Engineering, and help society cope with the challenge of climate changes.

Congress name

“Climate Change: A New Challenge for Civil Engineering”

Topics

- * Water, Waste Water Treatment and Recycling
- * Roadways and Sustainable Mobility
- * Green Buildings

Dynamic

Through panels of national and international Experts, Keynote Speakers will expose presentations to those attending the Congress. We will get to know the world's latest technology improvements in three topics. At the end of this Congress there will be proposals on how to apply civil engineering knowledge to mitigate threats of climate changes.

Addressed to:

Entrepreneurs, professionals and suppliers involved with Civil Engineering, from government, academic and business sectors.

SPECIAL EVENTS

**CJ 20-30
CICNL**

7th General Assembly of the World Council of Civil Engineering attending delegations from over 40 countries, the WCCE will honor its Assembly within the framework of the Congress.

The Assembly of the Federación de Colegios de Ingenieros Civiles de la República Mexicana (FECIC)

20-30 Youth Chapter (20-30)

Young professionals from Colegio de Ingenieros Civiles de N. L. are strongly involved in the program of this congress and will call to a first meeting to expand and support the youth movement of civil engineers at an international level.

Technical Presentations

Under this modality each topic will be addressed in an open manner, discussing its problems and proposals. Each of the topics during the congress will get an assigned space and time to be dealt with.

ENGINEERING EXPO AND BUSINESS MEETING

(exhibition visits has no cost, only for professionals related to civil engineering)

**More than 50 exhibitors
featuring:**

- Machinery and equipment
- Materials
- Software and technology
- Services
- Finance
- Institutions and related agencies
- Journals

Business meetings appointments:

Using pre-set appointments, the congress will provide direct contact between exhibitors and visitors to create business opportunities.
