

# International Conference on Disaster Management

IIIRR Website: <http://iiirr.ucalgary.ca/>

Kumamoto, Japan, August 24 - 26, 2012

hosted by Kumamoto University

The annual International Conference organized by the International Institute for Infrastructure, Renewal and Reconstruction (IIIRR)

## Aim and Scope

Recent natural disasters including the Tohoku, Haiti and Chile earthquakes, tsunami, and the volcanic ash disruption to European air space demonstrated that the impact of disaster spread worldwide. Furthermore, the accident at the nuclear power plant triggered by Tohoku tsunami in Japan have highlighted difficulties of disaster preparedness. We need to develop multi-hazard, interdisciplinary, multi-stakeholder, and comprehensive approaches to disaster risk reduction.

We also need to rethink the way we design our infrastructure to mitigate disaster loss and to accelerate recovery process.

Conference Chairs

Prof. Shoshi Mizokami

Conference Co-Chairs

Prof. Ryuji Kakimoto

Prof. Fumihiko Yamada

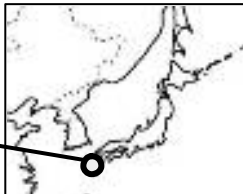

## Conference Themes

- Hazard mitigation, emergency response and recovery planning
- Socio-economic strategies for disaster risk reduction
- Social vulnerability
- Database and data models development
- Transportation systems
- Critical infrastructure
- Information systems
- Natural and technological (Natech) disasters

## Venue

Kumamoto Kotsu  
Center Hotel ,  
Kumamoto,  
Japan

Organizers

  
International  
Institute for  
Infrastructure  
Renewal and  
Reconstruction
