*** A brief description about Engineers Canada**

The Engineers Canada is a federation consisting of 12 constituent associations who regulate the 250, 000 professional engineers in Canada. The constituent associations appointed 22 members to the board. There are also 5 advisors to the Board representing committees or groups associated with Engineers Canada. The President-Elect and Executive Committee are elected from and by the 22 appointed members representing the constituent associations. The Presidents term is one year and usually from May to April. Engineers Canada is currently hosts and chairs the **World Federation of Engineering Organizations Committee on Engineering and the Environment**. It is a member in good standing with the World Federation of Engineering Organizations.
