Ms. Audrey Azoulay
Director General, UNESCO
7 Fontenoy Place
Paris, France

Dear Ms. Azoulay,

**FEIAP'S SUPPORT FOR DECLARATION OF WORLD ENGINEERING DAY FOR CLIMATE
CHANGE ACTION AND SUSTAINABILITY**

On behalf of the Member Economy of The Federation of Engineering Institution of Asia and the Pacific, FEIAP, I am writing to declare our strong support of our organisation for the proposal to declare *4th March of each year as World Engineering Day for Climate Change Action and Sustainability.*

For your information, FEIAP is a non profit organisation with a vision to be the premier professional organisation for Asia and the Pacific. FEIAP promotes sound engineering practice and support the socio-economic development objectives of the countries in Asia and the Pacific and beyond including economies in Africa and Europe. FEIAP also aims to facilitate the exchange of information and ideas related to engineering amongst the member organizations within the Asia, the Pacific and beyond as well as to promote an advance the science of the profession of engineering in any or all its branches of engineering and disciplines. The core value would be to have a network to promote the concept and application of sustainable development in engineering practices.

If the proposal is accepted, FEIAP will endeavour to celebrate World Engineering Day with its member economy participating in a wide range of activities that will promote the role of engineering for climate change action and to proceed to ensure its sustainability.

We hope that this World Engineering Day could be approved and celebrated world- wide.

Best Regards

Yours sincerely,

Dr Li, Chien Chung
FEIAP President
