Support for Declaration of World Engineering Day for Sustainable Development

Dear Ms. Azoulay

On behalf of the students, professors and employees of the TH Georg Agricola University in Bochum, Germany, I am writing to indicate the strong support of our university for the **Declaration of 4th March of each year as World Engineering Day for Climate Change Action and Sustainability**.

Founded as Mining School Bochum in 1816 the TH Georg Agricola University stands for competences on the field of engineering for more than 200 years.

We indirectly represent 2500 future engineers in form of our students and more than 26.000 engineers who have been graduated from our university in the past. If declared, our organisation commits to celebrating World Engineering Day with a wide range of activities that promote the role of engineering for climate change action and sustainability as urgent action is needed in these areas. Such celebrations will improve community recognition of the importance of engineering to society and the economy.

The activities to celebrate World Engineering Day is expected to encourage young people, girls and boys, to raise the number of people studying science and mathematics, increasing the intake of engineers into universities. This is critical for the sustainable development of our country.

We anticipate that our activities will reach and have an impact on the Metropolis Ruhr and its inhabitants.

Best regards and Glückauf
